

# Cancer is enough of a burden. Transportation doesn't have to be.

**Roundtrip makes it easy for cancer patients to get the transportation they need to receive their treatment. We make it simple and fast for clinical staff to organize transportation on behalf of patients who need a ride to or from their point of care.**

Cancer is enough of a burden. Going through chemotherapy, radiation, and rehabilitation appointments can be taxing and overwhelming. Figuring out how to get to those appointments doesn't have to be. Cited as the third most common barrier to care, transportation is a considerable problem for all patients. At Roundtrip, we are working to ensure that transportation is no longer a barrier to care for anyone — especially for cancer patients.

**Book Rides Ahead of Time**

Help ensure that the patient can get to an appointment with the flexibility of arranging transportation up to weeks or months in advance.

**Get a ride quickly**

The Roundtrip Community incentivizes the transportation companies with the best pick up times, allowing you to move patients faster.

**Receive Notifications that Keep Everyone in the Loop**

Frequent updates for the entire care team: the patient, the caregiver, the driver, and the person at the hospital.

**Repeat Rides for Recurring Appointments**

Ensure that transportation is an ongoing solution instead of a recurring challenge.

**Make Authorizations a Breeze**

Let us handle the process for Medicare Advantage and Medicaid patients.

**Manage Benefits for Each Patient**

Keep tabs on your budget, and track the number of rides you've allocated for each patient.
